

Patient: BraTS20_Training_001

Structure: Chiasm | Source: BraTS2020

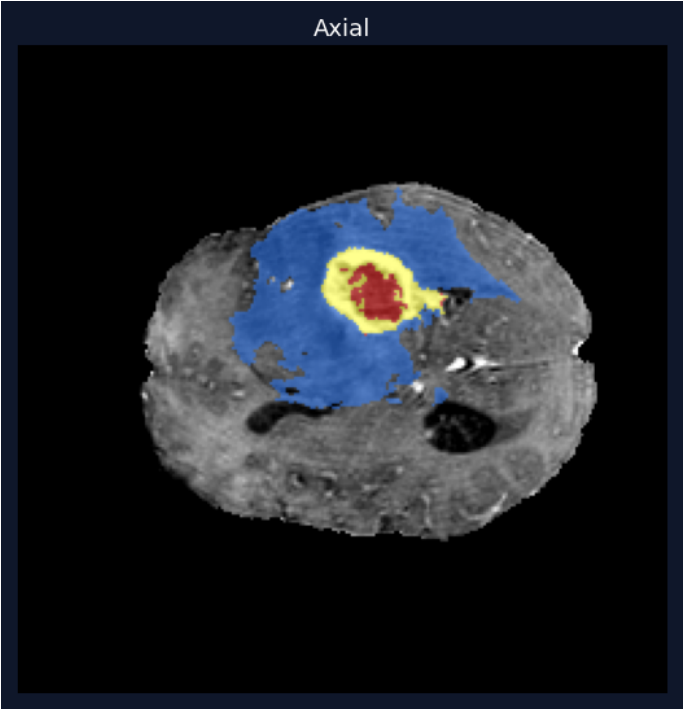

HIGH RISK

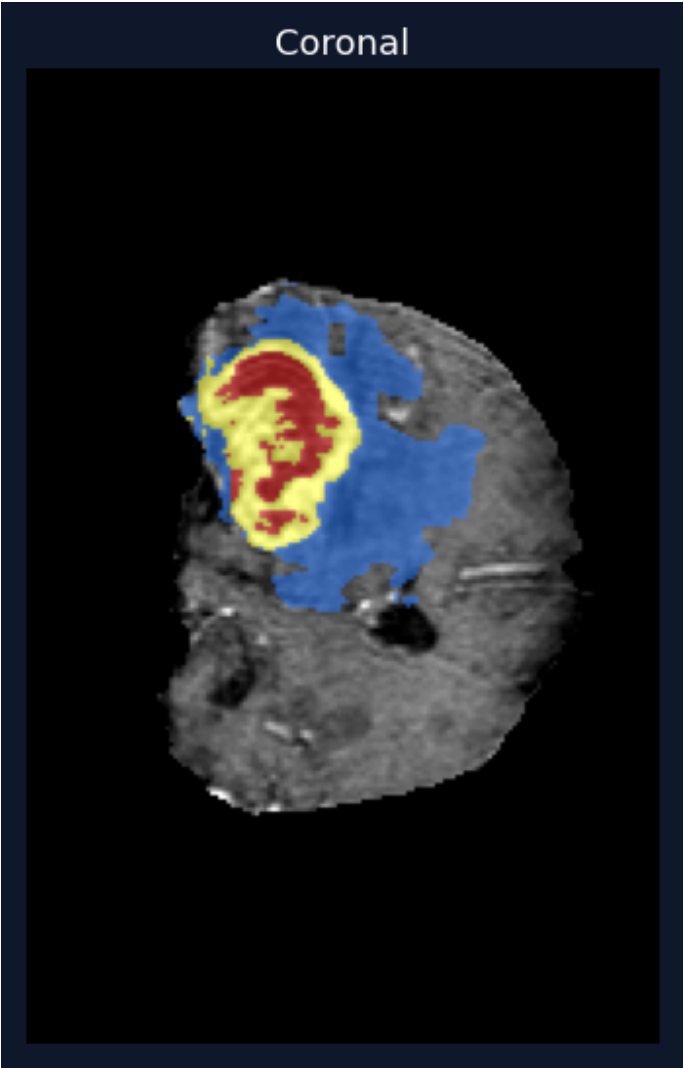

Key Metrics

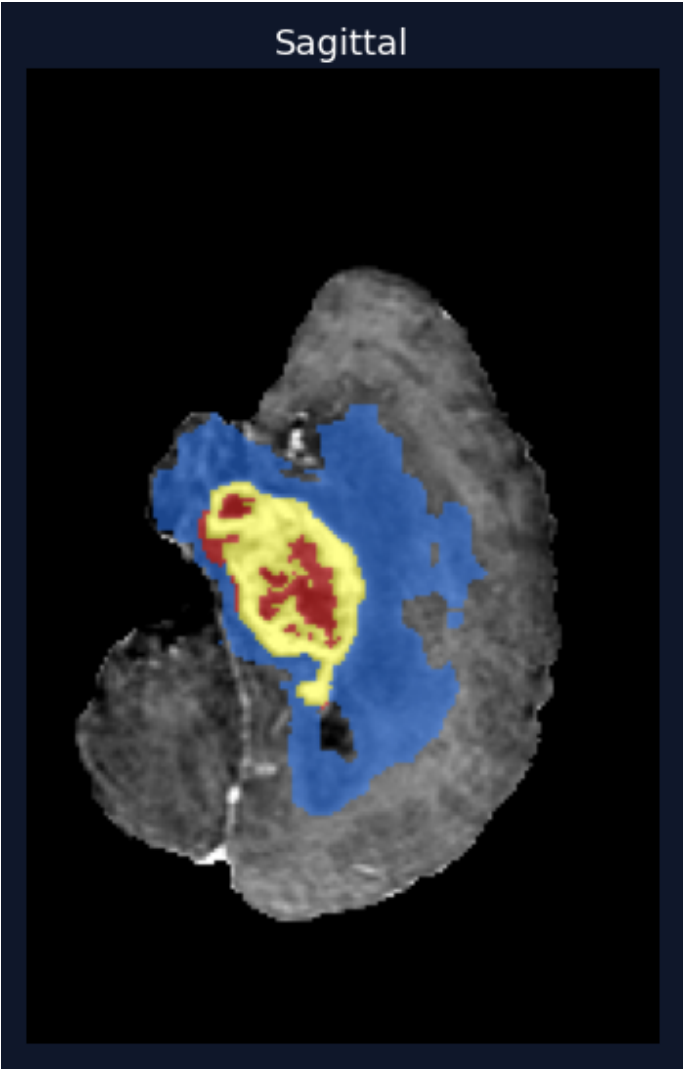

MRI Previews (Axial / Coronal / Sagittal)

Segmentation overlay at opacity=0.55. Red=Tumor Core, Blue=Edema, Yellow=Enhancing.

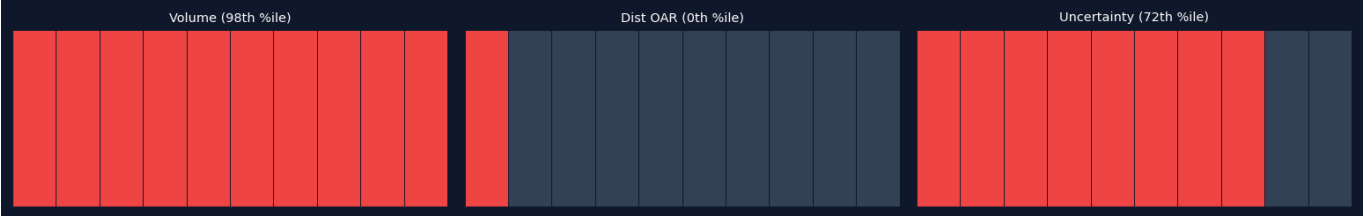

Risk Triggers

- > Proximity Alert: Distance to Chiasm (0.1mm) below 3mm threshold.
- > Uncertainty Alert: Score (0.848) exceeds 0.75 critical threshold.
- > Volume Alert: Tumor volume (212.0 cc) exceeds 25 cc.
- > Sensitive Structure: 'Chiasm' is part of the optic apparatus.

Comparison to Cohort

Metric	This Patient	Group Median	Percentile	Interpretation
Tumor Volume	212.0 cc	74.7 cc	98th	higher
Distance to OAR	0.1 mm	0.1 mm	0th	closer
AI Uncertainty	0.848	0.813	72th	higher

Recommended Actions

- 1. Manual slice-by-slice review of contour near OAR boundary.
- 2. Mandatory physician verification before treatment planning.
- 3. Multi-planar (axial/coronal/sagittal) contour integrity review.

This report is generated by a decision-support system and does not replace clinical judgment. All flagged contours require human verification before treatment delivery. Data: BraTS 2020 (Kaggle). Guidelines: AAPM TG-132, ESTRO, QUANTEC, ASTRO, NRG Oncology.
